

If It Isn't Broke Don't Fix It

Two positions on the Board of Kingsbridge Municipal Utility District are up for election on May 2. If you have ever attended one of their meetings, you know that members of this Board work together and get things done. There are not many members of the public who attend the MUD meetings, so most residents of the District have no idea what responsibilities the directors have or fundamental knowledge of what must be done. Usually, the only residents who attend the meetings are those who have a problem for the Board to address.

John Buhner has been on this Board since 2002 and no one knows our District better. Judy Shindler has been on this Board since 2020; she regularly attends other local government board meetings and maintains a relationship with them. You don't want to replace good public servants like these unless there is a vacancy that needs to be filled. Please re-elect John Buhner and Judy Shindler and keep our MUD running smoothly!

Let's keep John Buhner and Judy Shindler on board so they can continue to improve our community.
